1 Family 15h Models 30h-3Fh AMD A-Series Processor Features

1.1 Family 15h Models 30h-3Fh AMD A-Series Processor Features

This section lists the features and design capabilities of the Family 15h Models 30h-3Fh AMD A-Series Processor.

- **Compatible with Existing 32-Bit x86 and 64-bit AMD64 Code Base**
  - Including support for SSE, SSE2, SSE3, SSE4a, SSE4.1, SSE4.2, SSSE3, ABM, AVX, AVX1.1, AES, BMI, XSAVE/XRSTOR, XGETBV/XSETBV, PCLMULQDQ, FMA, FMA4, TBN, XOP, POPCNT, F16C, MMX™, OSXSAVE, CMPXCHG8B, CMPXCHG16B, FXSAVE, FXRSTOR CLFLUSH, and legacy x86 instructions
  - Runs existing operating systems and drivers
  - Local APIC on the chip
  - Light Weight Profiling (LWP) support

- **AMD64 Technology**
  - AMD64 technology instruction-set extensions
  - 64-bit integer registers, 48-bit virtual addresses, and 40-bit physical addresses
  - Sixteen 64-bit integer registers
  - Sixteen 128-bit SSE/SSE2/SSE3/SSE4a registers

- **Family 15h Architecture**
  - Dual-core and quad-core options
  - Shared L2 cache architecture storage in addition to exclusive L1 cache
  - Dedicated decode, dispatch, and microcode sequencer per thread

- **Cache Structures**
  - 16-Kbyte 4-Way Associative, Write-through Parity-Protected L1 Data Cache per Core
    - Two 64-bit operations per cycle, 3-cycle latency
  - 96-Kbyte 3-Way Associative Parity-Protected L1 Instruction Cache per Two Cores
    - With advanced branch prediction
  - 2048\(^1\)-Kbyte Maximum 16-Way Associative ECC-Protected L2 Cache Shared between Four Cores
    - Dynamic L2 cache sizing with power gating
      - 2048 Kbytes of L2 cache are available on quad-core options, and 1024 Kbytes of L2 cache are available on dual-core options.

- **Floating-Point Unit**
  - Dedicated 128-bit floating-point unit (FPU)

- **Management and Virtualization Features**
  - AMD Virtualization™ technology
    - SVM pause count capability
    - SVM disable and lock
    - Improved world-switch speed
• IOMMU v2.0
  • Refer to the AMD I/O Virtualization Technology (IOMMU) Specification, order# 34434, for additional information.
  • Address translation support
  • Page request interface
  • Nested paging
  • Flush all command
  • Architected performance counters

• Power Management
  • Multiple low-power states
  • AMD PowerNow!™ technology
  • System Management Mode (SMM)
  • ACPI-compliant, including support for processor performance states (P-states)
  • Supports processor power states C0, C1, CC6, and PC6
  • Supports sleep states including S0, S3, S4, and S5
  • Supports adaptive S4
  • PCIe® power gating
  • PCIe speed power policy
  • SmartSleep
  • AMD Turbo CORE technology with per-core power gating
  • Dynamic refresh rate supported with digital panels that support this feature

• Electrical Interfaces
  • Refer to the Electrical Data Sheet (EDS) for AMD Family 15h Models 30h-3Fh Processors, order# 48343, for electrical details of AMD Family 15h (Models 30h-3Fh) processors.

• Thermal Controls
  • Sideband temperature control (SB-TSI)
  • Hardware thermal control (HTC)
  • DRAM thermal protection

• PCIe® Technology
  • PCIe Gen 1.0 and PCIe Gen 2.0 technology supported:
    • Configurable x4 General Purpose Ports (GPP) link
    • x4 unified media interface link
  • PCIe Gen 3.0 technology supported:
    • Configurable x8 and x16 external graphics card expansion PCIe link
• **Integrated Memory Controller**
  - DDR3 SDRAM: Compliant with JEDEC DDR3 1.5V, DDR3L 1.35V, and DDR3U 1.25V SDRAM specifications
  - AMD Memory Controller PowerCap
  - Low-latency, high-bandwidth
  - DRAM Prefetcher:
    - Adaptive prefetching support
    - 32-entry DRAM prefetch table
    - Differentiation between core prefetch requests and core demand requests
  - Socket FM2r2 package
    - Dual 64-bit DDR3 SDRAM controller operating at frequencies up to 2133 MT/s (1067 MHz)
    - DDR3 1.5V up to 2133 MT/s, DDR3L 1.35V up to 1866 MT/s, DDR3U 1.25V up to 1600 MT/s
    - Supports up to two dual-rank SODIMMs or unbuffered DIMMs
    - Supports DRAM down or single SODIMM plus DRAM down

• **Platform Security Processor**

• **Available Packages**
  - Compliant with RoHS (EU Directive 2002/95/EC), with lead used only in small amounts in specifically exempted applications
  - FM2r2 package
    - Refer to the AMD FM2 Functional Processor Data Sheet, order# 48587, for functional and mechanical details of the FM2r2 package processor.
    - 904-pin, lidded, Organic Micro PGA
    - 1.27-mm pin pitch
    - 40 mm x 40 mm
    - 31 x 31 row pin array
1.2 Family 15h Models 30h-3Fh AMD A-Series Graphics Features

This section lists the graphics features available for the Family 15h Models 30h-3Fh AMD A-Series accelerated processor when the internal GPU is enabled.

- **Graphics**
  - Discrete-level graphics processor embedded alongside the x86 CPU complex
  - Dedicated graphics memory controller
  - Refer to *AMD Family 15h Models 30h-3Fh Processor Power and Thermal Data Sheet*, order# 51284, for graphics engine clock speeds.
  - AMD Eyefinity
    2 AMD Eyefinity is available on selected AMD A-Series accelerated processors and may support up to four displays, when at least two displays are operating with DisplayPort 1.2 multi-streaming.
  - AMD Dual Graphics support
    3 AMD Dual Graphics support is available on selected AMD A-Series accelerated processors, with limited discrete graphics processors and on the Windows® 8 operating system.

- **Power Management**
  - GPU power gating
  - UVD power gating
  - VCE power gating
  - GFX power gating
  - DCE power gating
  - SCLK, LCLK, DCLK and VCLK scaling
  - Graphics Memory Controller (GMC) power gating
  - AMD PowerPlay™ power management technology
  - Dynamic refresh rate supported with digital panels that support this feature
  - Vari-Bright™ technology
  - Dynamic refresh rate
  - Frame Buffer Compression
  - Panel Self-Refresh
  - PowerTune

- **3D Acceleration Features**
  - DirectX® 11.1 compliant, including full speed 32-bit floating point per component operations:
    - Shader Model 5 geometry and pixel support in a unified shader architecture
      - Graphics Core Next (GCN) architecture
      - Advanced shader instructions, including flexible flow control with CPU-level flexibility on branching
      - Read/Write caching system, replacing texture cache with a unified read-write two-level cache
      - Vertex, pixel, geometry, compute, domain, and hull shaders
      - 32-bit and 64-bit floating point processing per component
      - High performance dynamic branching and flow control
      - Shader instruction store, using an advanced caching system
      - Advanced shader design, with ultra-threading sequencer for high efficiency operations
      - Advanced, high performance branching support, including static and dynamic branching
      - High dynamic range rendering with floating point blending, texture filtering, and anti-aliasing support
      - 16-bit and 32-bit floating point components for high dynamic range computations
      - Full anti-aliasing on render surfaces up to and including 128-bit floating point formats
  - Support for OpenCL™ 1.2, DirectCompute 11 and Microsoft C++ AMP
  - Support for OpenGL 4.1/4.1+
Family 15h Models 30h-3Fh AMD A-Series Processor Features

- Partially Resident Texture (PRT) support
- Anti-Aliasing Filtering: 4
  - Support for anti-aliasing filtering is dependent on application.
  - 2x/4x/8x MSAA (multi-sample anti-aliasing) modes are supported
  - Multi-sample algorithm with gamma correction, programmable sample patterns, and centroid sampling
  - Custom filter anti-aliasing with up to 12-samples per pixel
  - Adaptive anti-aliasing mode
  - Lossless color compression (up to 16:1)
- Anisotropic Filtering: 5
  - Support for anisotropic filtering is dependent on application.
  - Up to 128-tap texture filtering
  - Anisotropic biasing to allow trading quality for performance
  - Improved anisotropic filtering with unified non-power of two-tap distribution and higher precision filter computations
  - Advanced texture compression (3Dc+)
  - High quality 4:1 compression for normal maps and luminance maps
  - Angle-invariant algorithm for improved quality
  - Single-channel or two-channel data format

- 3D resources virtualized to a 40-bit addressing space, for support of large numbers of render targets and textures
- Support for up to 16k x 16k textures, including 128-bit/pixel textures
- Software-upgradeable, programmable arbitration logic maximizing memory efficiency
- Fully associative texture, color, and Z cache design
- Hierarchical Z and stencil buffers with early Z Test
- Lossless Z-buffer compression for both Z and stencil
- Fast Z-buffer clear
- Fast color-buffer clear
- Z cache optimized for real-time shadow rendering
- Z and color compression resources virtualized to a 32-bit addressing space, for simultaneous support of multiple render targets and textures

- **Motion Video Acceleration Features**
  - Supports DVD, Blu-ray, and SDTV/HDTV content playback with low CPU usage
  - Supports stereoscopic 3D Blu-ray
  - Video compression engine:
    - Dedicated hardware (VCE 2.0) assisted encoding of HD video streams to H.264 (main profile)
    - Support H.264 SVC temporal scalability
    - Real-time transcoding by encoding the output from UVD with reduction of CPU utilization and power consumption
  - Motion video decode acceleration technology:
    - Dedicated hardware (UVD) for H.264, MPEG4, VC-1, MVC, and MPEG2 decode:
      - H.264 implementation based on the ISO/IEC 14496-10 specification
      - MPEG implementation based on the ISO/IEC 14496-2 specification
        - Sprite, global motion compensation, and reversible variable length coding are not supported.
      - VC-1 implementation based on the SMPTE 421M specification
      - MPEG2 implementation based on the ISO 13818-2 specification
      - Multi View Coding (MVC) for Blu-ray 3D content
      - WMV-9 implementation
    - Real time high-definition and standard definition stream decode
    - Real time dual high-definition stream decode
- Microsoft DirectX video acceleration (DXVA) API (application programming interface) for Windows operating system

**Motion Video Process Acceleration:**
- Video scaling and YCrCb to RGB color space conversion for video playback and fully adjustable color controls
- Motion adaptive and vector based de-interlacing filter eliminates video artifacts caused by displaying interlaced video on non-interlaced displays, and by analyzing image and using optimal de-interlacing functions on a per-pixel basis
- HD HQV and SD HQV support: noise removal, detail enhancement, color enhancement, cadence detection, dynamic contrast, flesh tone correction, dynamic range, gamma, and advanced de-interlacing
- Advanced up-conversion for SD to HD resolutions

**Display Interfaces**

7 Refer to Table 2 on page 12 for maximum resolution, color depth, and audio support per display interface.

• Four independent display controllers enabling four displays in extended or clone modes

8 See the "Display Interface Design Guidelines" chapter in the *FM2+ Platform Motherboard Design Guide*, order# 51617 for simultaneous display combinations and display restrictions.

• HDCP9,10 (High-bandwidth Digital Content Protection) supported on HDMI™ (High-Definition Multimedia Interface), DVI (Digital Visual Interface), Miracast, and DisplayPort

9 HDCP content protection support is available only to HDCP licensees and can be enabled only when connected to an HDCP-capable receiver.

10 HDMI/DVI support HDCP 1.4. DisplayPort supports HDCP 1.1

• DVI/HDMI Features

11 Refer to Table 1 on page 11 for HDMI feature table.

- Supports DVI or HDMI using TMDS data encoding
- Supports industry-standard CEA-861-D/E video modes including 480p, 720p, 1080i, and 1080p
- Supports single-link DVI with resolutions of up to 1920 x 1200 at 60 Hz, 24 bpp, RB
- Supports dual-link DVI with resolutions of up to 2560 x 1600 at 60 Hz, 30 bpp, RB
- Maximum pixel clock rate of 162 MHz for single-link DVI, and 297 MHz for HDMI
- HDMI modes up to 1920 x 1080 at 60 Hz and Deep Color as well as all HDMI 4k x 2K modes at 24/30 Hz modes at 24 bpp
- Dolby® Digital, Dolby Digital Plus, DTS Digital, DTS-HD High Res, Dolby TrueHD and DTS-HD Master Audio
- Supports stereoscopic 3D gaming, Blu-ray 3D, and stereoscopic 3D video via HDMI12 stereoscopic 3D packed frame format

12 Support is available through software, in full-screen and windowed mode.

• Miracast Wireless Display Features

13 1080 is available on selected models

- One wireless display low latency wireless display output at up to 1920 x 1080
- Total display head limit remains four total with up to one being Miracast
- Supports HDCP 2.2 protection for the wireless display output
- Miracast compliant under Windows 8 when paired with specific Wi-Fi WLAN subsystems14

14 Contact AMD for current list of compatible Wi-Fi subsystems

• DisplayPort Features

- Supports all mandatory features of the VESA DisplayPort Standard, Version 1.2, plus the following optional features:
- Supports DP++
- Supports Panel Self Refresh (PSR)15

15
Contact AMD for a current list of qualified PSR panels

- DisplayPort audio
  - Linear PCM, Dolby Digital (AC-3), Dolby TrueHD, DTS, and DTS-HD Master Audio
  - LPCM at sample rates: 32 kHz, 44.1 kHz, 48 kHz, 88.2 kHz, 96 kHz, 176.4 kHz, and 192 kHz, Bits per sample: 16, 20, and 24
  - Supports up to 8 channels
- Supports 4, 2, or 1-lane transmission
- Supports 5.4 Gbps (HBR2), 2.7 Gbps, and 1.62 Gbps link bit rates
- Supports 1 Mbps Auxiliary Channel (AUX CH)
- Supports DisplayPort Multi-Stream Transport (MST) for up to four independent video and audio streams on one connector
- Maximum resolution of 4096 x 2160 at 30 Hz and 24 bpp (single stream)
  - Supports 2560 x 1600 at 60 Hz (single stream)
  - Support for tiled displays with resolution of up to 4096 x 2160 at 60 Hz DisplayPort 1.2 MST
- Supports Embedded DisplayPort (eDP) features as described in the VESA eDP Standard, Version 1.3
- Supports stereoscopic 3D gaming, Blu-ray 3D, and stereoscopic 3D video via DisplayPort/eDP for 120-Hz frame sequential monitors and internal LCD panels

</tr>
</tbody>
</table>

**Notes:**
1. 36-bpp mode uses 30 bpp of meaningfully derived data.
2. 12-bit mode uses 10 bits of meaningfully derived data.
3. Some models do not support the highest resolutions.
4. Stereo 3D refresh rates are specified per eye.
Table 2 shows the maximum resolution for each output configuration.
